

## DoD Subcontractor Finds Major Savings & Peace of Mind with Avatara's DoD Platform

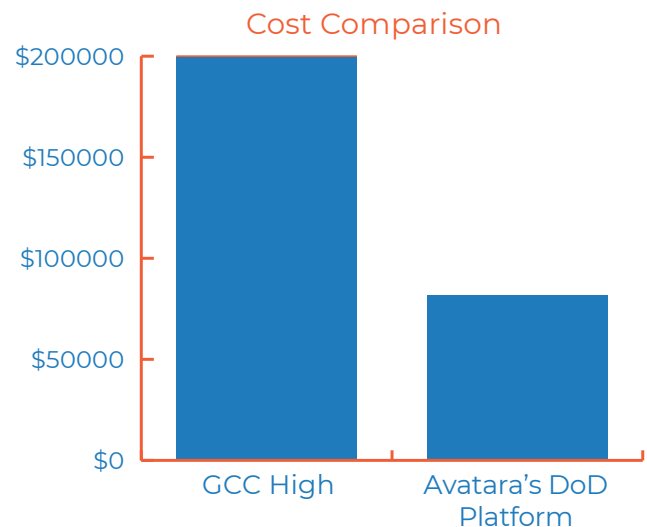

When it was time for one of our DoD subcontractor clients to upgrade their technology to meet CMMC compliance, they knew they had an important decision to make. As a company that provides high technology engineering services to the US Army, US Air Force, USMC, US Navy, and the Australian Defense Force, meeting cybersecurity standards was crucial to winning DoD contracts and maintaining a competitive advantage.

### INVESTMENT

The client received bids for Avatara's DoD Platform and Microsoft 365's GCC High. Almost immediately upon comparison, the choice was clear.

**Microsoft GCC High** licensing would cost SDI nearly \$90,000 annually, not including implementation costs. They were already spending \$117,000 a year and GCC High would be an additional expense, bringing their annual IT budget to over **\$200,000**.

**Avatara's DoD Platform** on the other hand, would replace their entire IT infrastructure, eliminating their prior expenses, for a total annual investment of **\$82,000**.

*In other words, Avatara's DoD Platform would cut IT expenses by nearly 60% annually.*

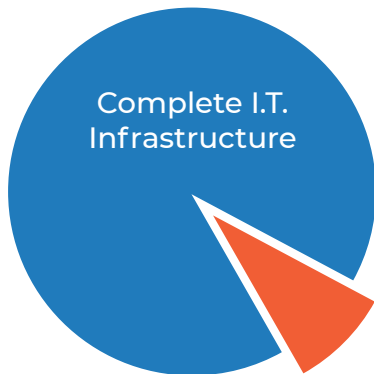

### AVATARA'S DOD PLATFORM BENEFITS

- All-inclusive platform
- Meets DoD technical requirements
- Turn-key migrations
- US or ITAR compliance support
- Competitive price point
- Future-proofing solution
- 24/7 technical support

## THE REAL DIFFERENCE

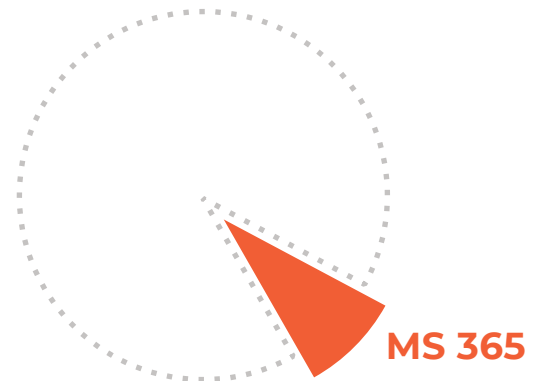

Most importantly, GCC High offers just a tiny slice of the pie that Avatara's DoD Platform's all-inclusive, DoD-friendly platform includes. While GCC High only includes Microsoft 365 Licensing, Avatara's DoD Platform includes that plus an entire IT infrastructure.

Avatara's DoD Platform

- Servers & Unlimited Storage
- Artificial Intelligence
- Unified Communications
- Collaborations Tools
- Hosted Desktops
- 24/7 Support
- Business Analytics
- Email Archive
- Connectivity
- Local Hardware
- Managed Security
- File Sharing

Microsoft GCC High

## SPECIALTY MATTERS

Unlike GCC High's large enterprise focus, Avatara's DoD Platform specializes in helping small to mid-sized companies become more competitive through strategic IT. We believe the philosophy of exceptional care at an affordable price and provide customers with the opportunity to refresh their technology, increase capability, and improve their competitive situation with no capital cost.
